

To Scheme Actuaries

October 2007

Dear Member,

CMI Working Paper 29: An analysis of the results of the mortality of male and female pensioners of self-administered pension schemes for the period 2000 to 2004 based on data collected by 30 June 2006

This report has been posted onto the Actuarial Profession's website and may be found at:

http://www.actuaries.org.uk/Display_Page.cgi?url=/cmi/cmi_workingpapers.html

The report, the fourth to be produced on this ongoing study, examines data submitted up to June 2006 and was originally made available to CMI SAPS members in March 2007. The report is now made publicly available together with summary files of the data used in the analysis.

The CMI SAPS Committee has a very active schedule of work planned for the coming year, which will include an experience report on data received by 30 June 2007 and graduations of mortality tables based on the SAPS data.

Both the CMI and the Pensions Board are indebted to data contributors. However I would encourage all scheme actuaries who are valuing schemes with at least 500 pensioner lives to submit data (if they have not done so already) so that the analyses can be based on as full data as possible.

Yours sincerely

John Dickson
Chairman, Technical Support & Research Committee of the Pensions Board
