

GN11: Retirement Benefit Schemes - Transfer Values

Classification

Practice standard

Legislation or Authority

Pension Schemes Act 1993. (c.48).

Pensions Act 1995, (c.26).

Regulations set out in Appendices 1 (the 'Principal Regulations'), 2, 3 and 4.

Matrimonial Causes Act 1973, (c.18).

Family Law (Scotland) Act 1985. (c.37)

London Stock Exchange. *The listing rules* (as updated).

Northern Ireland has its own body of law relating to pensions and to family law. In relation to Northern Ireland, references to the Great Britain legislation contained in this Guidance Note should be read as including references to the corresponding Northern Ireland legislation. The Northern Ireland Regulations corresponding to the Great Britain Regulations are included in Appendices 1, 2 and 4. The Inland Revenue Regulations in Appendix 3 apply to Northern Ireland as well as to Great Britain. Appendix 6 shows the Northern Ireland legislation corresponding to the Great Britain Acts mentioned in this Guidance Note and any reference to the Secretary of State should be read as including a reference to the Department of Health and Social Services for Northern Ireland.

Application

Any actuary responsible for the calculation of cash equivalents under the Regulations and other individual transfer values from all types of retirement benefit schemes and to the assessment of benefits in such schemes in respect of incoming transfer payments.

This Guidance Note may be used for purposes of the Stock Exchange Listing Rules.

This Guidance Note has been approved by the Secretary of State for Social Security, the Secretary of State for Scotland and the Department of Health and Social Services for Northern Ireland for the calculation and verification of the value of benefits under a pension scheme for the purposes of divorce proceedings.

Author

Pensions Board.

1 Introduction

- 1.1 These guidelines apply to the basis of calculation of cash equivalents under the Regulations and to the assessment of benefits in retirement benefit schemes in respect of incoming transfer payments.
- 1.2 The guidelines relate to United Kingdom requirements and conditions.
- 1.3 The guidelines also apply to other individual transfer values from retirement benefit schemes where no cash equivalent, within the provisions of the Pension Schemes Act 1993, arises and in those cases reference in this Guidance Note to the Regulations should be ignored and references to "cash equivalent" should be read as references to "transfer value".
- 1.4 This Guidance Note is not intended to inhibit trustees from paying transfer values greater than cash equivalents.
- 1.5 The guidelines also apply to the calculation of pension costs for the purpose of disclosure in the annual report and accounts of companies in respect of directors of certain UK companies. In such cases it may be necessary to calculate the value of accrued benefits in circumstances in which no entitlement to a transfer value exists, for example because payment of benefit has commenced. In such cases, the valuation should be consistent with the calculation of transfer values for the scheme concerned or (where no transfer values are payable from the scheme) for other schemes of the same employer. For the purposes of this paragraph, no allowance should be made for a reduced cash equivalent (see paragraph 5.2 below) and in particular the guidelines may be used for unfunded schemes. For the avoidance of doubt, Section 4 below would also apply. If benefits are payable from an overseas scheme, the calculation should be consistent with this Guidance Note, taking account of economic conditions in the country concerned.
- 1.6 The guidelines also apply to the calculation and verification of the value of benefits under a pension scheme for the purposes of divorce proceedings as specified in Regulations (Appendix 4). If a spouse's benefit is provided under the rules of a scheme, the value of the spouse's benefit may need to be

calculated and shown separately, although a precise calculation may not be necessary. Where cash equivalents are reduced in accordance with paragraph 5.2, such reductions would apply for the purposes of this paragraph. For the avoidance of doubt, Section 4 below would also apply for the purposes of this paragraph.

2 Purposes of the Guidelines

- 2.1 The purposes of the guidelines are (a) to ensure that members of retirement benefit schemes exercising a right to a cash equivalent can be assured that it fairly reflects the benefits otherwise available following withdrawal with entitlement to a deferred pension and (b) to ensure that incoming transfers are dealt with consistently with outgoing cash equivalents.

3 Standard Basis of Calculation

- 3.1 It is a fundamental requirement, stemming from the legislation, that a cash equivalent should represent the actuarial value of the benefits which would otherwise have been preserved. Such actuarial value should represent the expected cost within the scheme of providing such benefits and should be assessed having regard to market rates of return on equities, gilts or other assets as appropriate (see paragraph 8.3).
- 3.2 Where a deferred pensioner is entitled as of right to exercise an option on terms which are specified in the scheme documentation and are financially disadvantageous to the scheme, account should be taken of the likely cost of such an option on the basis of the assumed probability of deferred pensioners generally exercising the option.
- 3.3 Guaranteed or statutory increases, both in deferment and after retirement, should be valued as part of the preserved benefit.
- 3.4 The actuary has to bear in mind that Regulation 8(2) of the Principal Regulations requires that the discretionary grant of additional benefits must be taken into account in certain circumstances unless the trustees direct otherwise. The actuary should therefore establish with the trustees the extent to which they consider it appropriate to make an addition for future discretionary increases to the preserved benefit or for any other benefits granted on a discretionary basis, for example the amount of pension payable on early retirement granted to members who have left service, when calculating its value for transfer. If the trustees propose to direct the actuary to exclude any allowance for discretionary benefits in the calculation of cash equivalents, in accordance with Regulation 8(3) of the Principal Regulations they are obliged to consult the actuary and obtain a written report from him or her within the time limits given. The report should cover the implications for the state of funding of the scheme of making such a direction, including the actuary's advice as to whether or not

there would be any adverse implications for the funding of the scheme should the trustees not make such a direction.

- 3.5 In calculating benefits in respect of transfer values received by a retirement benefit scheme the actuary should use methods and assumptions which are reasonable and consistent with the methods and assumptions (including any allowance for future discretionary benefits) normally used for outgoing cash equivalents from that scheme. Section 4 may be taken into account as described in 4.10. Appropriate adjustment would be required, in respect of incoming transfers, to take account of expected salary increases in cases where 'added years' are to be credited. In cases where the trustees, in accordance with paragraph 3.4, have given a general direction to the actuary that discretionary benefits should *not* be taken into account, then the same principles should be applied to the calculation of the benefits in respect of incoming transfer values so as to maintain consistency between the bases for outgoing cash equivalents and transfer credits in respect of incoming transfer values.
- 3.6 In the case of both incoming transfers and outgoing cash equivalents, allowance for expenses may be made where appropriate, e.g. to reflect administrative costs incurred, the saving in cost of paying pensions and any relevant costs of sale or purchase of investments.
- 3.7 Separate values should be quoted of the parts of the cash equivalent which represent benefits in respect of service after 5 April 1997 and, where the payment is to an Appropriate Personal Pension Scheme or to a Contracted-Out Money Purchase Scheme, Guaranteed Minimum Pensions (GMP) under the transferring scheme. These values should be calculated consistently with the calculation of the total cash equivalents, in particular with a consistent assumption as to the expected annual statutory increases in the GMPs.

4 Minimum Cash Equivalent

- 4.1 In the case of a scheme to which Section 56 of the Pensions Act 1995 applies (the Minimum Funding Requirement (MFR)), the cash equivalent calculated in accordance with Section 3 above shall be increased, where necessary, to the liability which would be calculated in accordance with GN27, as at the effective date of the calculation, in respect of the member (or that part of the member's benefits concerned). A scheme with a 'gilts-matching policy' for deferred pensioners should use a gilts-based calculation in accordance with GN27. The assumptions specified in GN27 may be appropriately modified to take account of individual circumstances, as set out in this section.
- 4.2 For the purposes of the calculation of the minimum cash equivalent the MFR Pension Age should be used.
- 4.3 The age definition used for the minimum cash equivalent calculations need not be the same as that used for the most recent MFR valuation (if any), but care should be taken to ensure that the calculations are appropriate for the age

definition used. In any event the age definition should allow for at least quarter years.

- 4.4 The mortality assumptions to be used are those set out in GN27. This does not prevent an actuary using other mortality assumptions, including unisex mortality rates, in the standard basis of calculation.
- 4.5 Although GN27 sets out a basis for proportions married and age differences between members and their spouses, it is permissible for this purpose to use the actual marital status of the scheme member if this is appropriate. The actuary should have regard to the marital status eligibility requirement for benefit provision under the scheme rules (for example married at date of leaving or married at date of death). Where and only where a spouse's pension would be payable only to a member's current spouse, that spouse's age may be used.
- 4.6 The same assumptions as those in GN27 should be used for calculating the amount of the scheme member's pension that can be given up for cash at retirement.
- 4.7 The rates of return to be used are those set out in GN27. For administrative convenience, the MVAs used need not be those applicable on the effective date of the calculation. MVAs may be changed on a regular basis, not less frequently than monthly. The MVAs to be applied in a cash equivalent calculation will be those at the last date of change before the relevant guarantee date.
- 4.8 The specific allowance for expenses in GN27 is for the closure or wind-up of a scheme. These expenses are therefore not appropriate for the purpose of calculating minimum cash equivalents. The financial assumptions in GN27 make an implicit allowance for expenses and no further addition therefore should be made by the actuary.
- 4.9 In most cases the modification of the GN27 assumptions, as set out in this section, to take account of individual circumstances should not produce an aggregate result of the minimum cash equivalents for the whole scheme greatly different from the unmodified MFR cash equivalents. However, if the assumptions used combined with any unusual features of the scheme produce a significant bias, which results in this relationship no longer remaining valid, the actuary should inform the trustees of this and advise them of any implications.
- 4.10 For an outgoing cash equivalent, the minimum cash equivalent calculated under this Section 4 may exceed the cash equivalent calculated on the standard basis under Section 3. Similarly the transfer credit in respect of an incoming transfer calculated on the standard basis may exceed the transfer credit calculated on the minimum basis. In this situation, the lower transfer credit, on the minimum basis, may be granted.

5 Departures from the Foregoing Bases of Calculation

- 5.1 Where an age-related payment by the Secretary of State for Social Security is outstanding, the cash equivalent shall first be calculated on the basis of the benefits to which the member would have been entitled had the payment already been made. The cash equivalent shall then be reduced by the amount of the age-related payment, where this is payable to the receiving scheme rather than to the transferring scheme.
- 5.2 If the immediate payment of a full cash equivalent would reduce the security for the benefits of other members, the actuary should advise the trustees as to any reduced cash equivalent which would be appropriate having regard to the provisions of Regulation 8(4) or 8(6) of the Principal Regulations. The actuary may also advise them that the member's interests might be better served by deferring the taking of a cash equivalent until a later date. Where no reduction is allowed, the actuary should draw the implications of this to the trustees' attention.
- 5.3 In cases where an outgoing cash equivalent is under consideration in respect of a withdrawing member, in respect of whom a transfer value has previously been received, special care may be needed in the choice of the method of calculation - particularly where 'added years' have been credited - to ensure that the outgoing cash equivalent is, subject to paragraph 5.2, both equitable in relation to, and consistent with, the transfer value received. Except as described in paragraph 5.2, the cash equivalent should not be less than the value of the alternative deferred benefits.
- 5.4 Special considerations apply in cases where the circumstances of a previous transfer had been such that the assets transferred bore no direct relationship to the leaving service benefits under the previous scheme. These may result from a 'bulk' exercise - for example, on a rationalisation of the schemes in a group or a sale of all or part of a business or even a transfer of the whole scheme. Alternatively, there may be a transfer of one or more employees from one scheme of a group to another. Where such cases give rise to an entitlement to the member for a cash equivalent under Chapter IV of Part IV of the Pension Schemes Act 1993, then, for the purpose of paragraph 5.3, the cash equivalent should take account of the preserved benefit which would otherwise have been available had the member actually left service at the previous transfer date.
- 5.5 However, in cases where the former preserved benefit and/or the cash equivalent were augmented in connection with a full or partial dissolution of the former scheme (either in circumstances where the trustees were obliged to augment benefits in terms of the documents governing the scheme or alternatively at the discretion of the trustees or employer with the objective of enhancing the cash equivalents which would otherwise have been available for the purpose of buying out individual annuity contracts), then, for the purpose of paragraph 5.3, comparison should be made with such higher values.

- 5.6 If in the actuary's opinion an incoming transfer value would be insufficient to provide minimum statutory benefits (eg a Guaranteed Minimum Pension), the actuary should advise the trustees accordingly.
- 5.7 Regulation 8(8) of the Principal Regulations requires cash equivalents to be reduced in certain circumstances to less than those which would otherwise apply under this guidance. Such circumstances would include some 'Transfer Club' arrangements.

6 'Partial' Cash Equivalents

- 6.1 Under the provisions of the Principal Regulations, a member who remains in employment but wishes to cease pensionable service (eg to go into a personal pension scheme) acquires a right to a cash equivalent only in respect of part of his benefit. These partial benefits in respect of money purchase benefits are those which accrue after 5 April 1988 and for final salary schemes are those which are attributable to the member's pensionable service after 5 April 1988. In the case of benefits which have not accrued as a result of the member's pensionable service, for example transfer credits, these are excluded or included according to whether they were credited to the member on or before or after 5 April 1988.
- 6.2 Any balance of benefit left in the scheme can give rise to a future right to a cash equivalent on a subsequent termination of employment (Regulation 4 of the Principal Regulations).
- 6.3 Partial cash equivalents can also occur when a transfer is made from a contracted-out to a contracted-in scheme leaving the liability for GMP and post-5 April 1997 Contracted-out Salary Related rights behind. In that circumstance, the whole cash equivalent should be calculated in the normal way and an amount deducted which is calculated consistently in respect of the retained liability.

7 Money Purchase Schemes and Personal Pension Schemes

- 7.1 Generally the above principles apply to transfers arising out of money purchase schemes and personal pension schemes where the cash equivalents depend on making estimates of the value of benefits. Where all or part of the member's benefits depend directly on the proceeds of an earmarked investment, the corresponding cash equivalents will be the realisable value of that investment, eg the amount of a building society deposit or the cash value of a policy of insurance earmarked for the member. Similarly, if all or part of an incoming transfer value is to be applied to an earmarked investment, the benefit to be granted will depend on the proceeds of the investment.
- 7.2 In respect of personal pension schemes and other money purchase schemes these guidelines do not apply where cash equivalents depend on rights which

do not fall to be valued in a manner which involves making estimates of the value of benefits, since the relevant Regulations make specific rules regarding the calculation of cash equivalents. They thus do not apply to any personal pension schemes or money purchase schemes which are invested in unit trusts, bank or building society deposits or insurance contracts.

- 7.3 In relation to transfers to personal pension schemes, for the purposes of giving a certificate under Regulation 6 of the Personal Pension Schemes (Transfer Payments) Regulations 1988 the same principles as outlined in Sections 3 to 5 above should be applied.

8 Presentation

- 8.1 It is not necessary for each cash equivalent to be authorised separately by the actuary. The actuary may supply tables, for use by the trustees and administrators, for calculating the amount of any cash equivalent payable and the pensionable service or other benefits to be credited for an incoming payment. The actuary should specify the circumstances (eg changes in investment conditions or cases involving previous receipt of a transfer value) in which adjustments to the tables or revised rates would apply.
- 8.2 The effective date of calculation shall be the guarantee date as defined in the legislation. The cash equivalent will normally be guaranteed, provided the member applies for payment within three months of the guarantee date.
- 8.3 The actuary is required to certify to the trustees that the method and assumptions being used in the calculation of a cash equivalent are consistent with the legislation. A specimen certificate for this purpose is provided in Appendix A. This should be amended as necessary to make it appropriate for the scheme concerned.

Appendix A

To the Trustees of the [] Pension Scheme:

I certify that the methods and assumptions underlying the calculation of cash equivalents for leavers from the [] Pension Scheme as specified in the tables and instructions dated [] are consistent with:

- (i) the requirements of Chapter IV of Part IV of the Pension Schemes Act 1993;
- (ii) *Retirement Benefit Schemes - Transfer values (GN11)* issued by the Institute of Actuaries and the Faculty of Actuaries; and
- (iii) the methods currently adopted and assumptions currently made in calculating the benefits to which entitlement arises under the Rules of the Scheme for a person who is acquiring transfer credits under those Rules

and provide as a minimum an amount consistent with those used for the purposes of Section 57 of the Pensions Act 1995, subject only to appropriate adjustments.
