

Faculty Sessional Meeting

CMI Self Administered Pension Scheme Mortality Tables

**Tuesday 5 February 2008, The Royal College of Physicians, 9 Queen Street, Edinburgh
at 5.00pm**

An additional sessional meeting of the Faculty of Actuaries will be held on Tuesday 5 February 2008 at 5.00pm at The Royal College of Physicians, 9 Queen Street, Edinburgh. Tea will be served from 4.30pm.

This is the moment pensions actuaries have been waiting for - the new graduated table of self-administered pension schemes' mortality will be out for consultation. How will you use the tables? Deciding which ones to use and how to scale them for your schemes will mean another round of mortality discussions with your colleagues and clients, so make sure you are on top of the issues. Are you happy with how they have been graduated and the treatment at young and old ages, and what that will mean for how you use them and the results coming out?

Members of CMI's SAPS committee will present the graduated table consultation document and also lead a discussion on the production and use of the tables. This is your big chance to quiz them as this is the only planned discussion during the consultation period. Written contributions are also encouraged.

Anyone wishing to claim CPD for attending the meeting should ensure that they sign the register of attendees that will be available on the night, although all members are responsible for entering their own CPD activity records.
