

## ARTICLES, PAPERS AND PUBLICATIONS OF ACTUARIAL INTEREST

THE STATISTICIAN, 35, 3 (1986)

AICKIN MICKEL. *Linear Statistical Analysis of Discrete Data*. "Even if you have read all the books on discrete multivariate data analysis published since the early 1970's this book will provide new insights into this rapidly developing field".

JOURNALS OF THE ROYAL STATISTICAL SOCIETY  
SERIES B (METHODOLOGICAL)

48, 1 (1986)

MUIRHEAD C.R. *Distinguishing outlier types in time series*.

48, 2 (1986)

DUCHARME AND LEPAGE. *Testing collapsibility in contingency tables*. Attention is "focused on 2.2.k tables. Finally, it is shown that in a collapsible table, the marginal odds-ratio is more efficient than the usual estimators of the common odds-ratio".

48, 3 (1986)

WINCEK AND REINSEL. *An exact maximum likelihood estimation procedure for regression—ARMA time series models with possibly non consecutive data*.

SERIES 'C' APPLIED STATISTICS

36, 1 (1987)

WAHRENDORF, BECHER AND BROWN. *Bootstrap comparison of non-nested generalized linear models: applications in survival analysis and epidemiology*.
