

Overview of session

In this session I will look at the key public service pension benefit design recommendations made by Lord Hutton and also the current Government proposals. I will give my views and propose alternatives. I will ask you for your views on your preferred benefit design and we will discuss, amongst other things, whether the actual changes or the alternatives are sustainable over the next 25 years.

The slides are best presented too and I will willingly share them with anyone who would like them after the session.

Steve Simkins
