The Institute and Faculty of Actuaries

Mortality Research Steering Committee (MRSC) – committee member

The Mortality Research Steering Committee (MRSC) is a group of actuaries and professionals from related disciplines who aim to advance mortality research. The committee is seeking to recruit new members from the actuarial community and related disciplines.

“Task” and “Person” Specification:

“Task” Specification

The committee member will be required to:

- help ensure IFoA mortality, morbidity and longevity research aligns with the IFoA strategic objectives through close liaison with the Research and Thought Leadership Committee (RTLCL)
- identify opportunities for collaboration with the wider community of academics, actuarial bodies and other professional associations
- maintain awareness of current research, emerging issues and hot topics in mortality, morbidity and longevity research and communicate these to the committee members
- assist with the oversight of knowledge exchange activities such as the publication of the IFoA’s ‘Longevity Bulletin’.

Tenure

This appointment is for a three year period.

Time commitment

The expected time commitment for this role is an average of one to two hours per month dependent upon activities undertaken. This includes attendance at four meetings of the MRSC per year in London, either in person or by conference call.

“Person” Specification

Candidates will ideally have the following skills and experience:

- is a member of the IFoA with considerable experience in this area, or is an academic with a track record of publication in relevant areas
- has an understanding of the research strategy of the IFoA and a desire to help shape and develop the future research agenda of the actuarial profession
- has expert actuarial subject knowledge and a strong interest in mortality, morbidity and longevity or a related discipline such as demography, epidemiology gerontology, etc.

- has a good industry or academic profile and a network of contacts in the mortality, morbidity and longevity field and/or related disciplines
- experience of producing and reviewing research outputs such as conference papers and research reports.

In return, the volunteer will:

- help to shape the future of demography, epidemiology, gerontology, longevity and mortality research
- be able to influence and contribute to this area at a policy level
- be provided with excellent professional support and assistance during their tenure on the committee
- develop their network of contacts across industry and academia.

Claiming CPD

If you intend to use the time spent on this activity when recording your CPD, remember it must be relevant to your work or role and address a personal development need. You should record an appropriate learning outcome. This is in accordance with the [CPD Scheme](#).
