## An Update from the CMI on IP and CI

Neil Robjohns

Secretary of CMI Income Protection Committee

Member of CMI Critical Illness Committee

Staple Inn Hall, London; 28<sup>th</sup> October 2009

## An Update from the CMI on IP and CI

# Agenda

- Critical Illness (individual business)
    - Recent results
    - Towards CI diagnosis rates
  - Income Protection (individual business)
    - Recent results
    - Graduation of IP claim inception rates
  - Gender Differentials
  - Changes in Data Formats
  - Forthcoming Attractions
-

An Update from the CMI on IP and CI

# Agenda

- Critical Illness (individual business)
    - Recent results
    - Towards CI diagnosis rates
  - Income Protection (individual business)
    - Recent results
    - Graduation of IP claim inception rates
  - Gender Differentials
  - Changes in Data Formats
  - Forthcoming Attractions
-

# An Update from the CMI: Critical Illness - Results

## CI Experience Summary - Timeline

- May 05: Results for 1999, 2000, 2001, 2002
- May 05: WP14 - Initial methodology & flag CMI CI issues
- Dec 05: WP18 - Feedback on WP14 & future work
- Apr 07: 2003 (Revised) and 2004 Results
- Jul 07: WP28 - Towards improved methodology
- Jul 08: WP33 - A new methodology (Adjusted Results)
- Jul 08: 1999-2004 Adjusted Results
- Oct 08: 2005 Results and Adjusted Results
- Oct 09: 2006 Results and Adjusted Results

# CI Experience Summary - Methodology

- CMI CI data / analysis problem:
  - Claims collected by year of settlement; diagnosis date often unknown; material lag from diagnosis to settlement
- Start with the known in-force and settled claims

In Force at 1 Jan

Settled Claims

# CI Experience Summary - Methodology

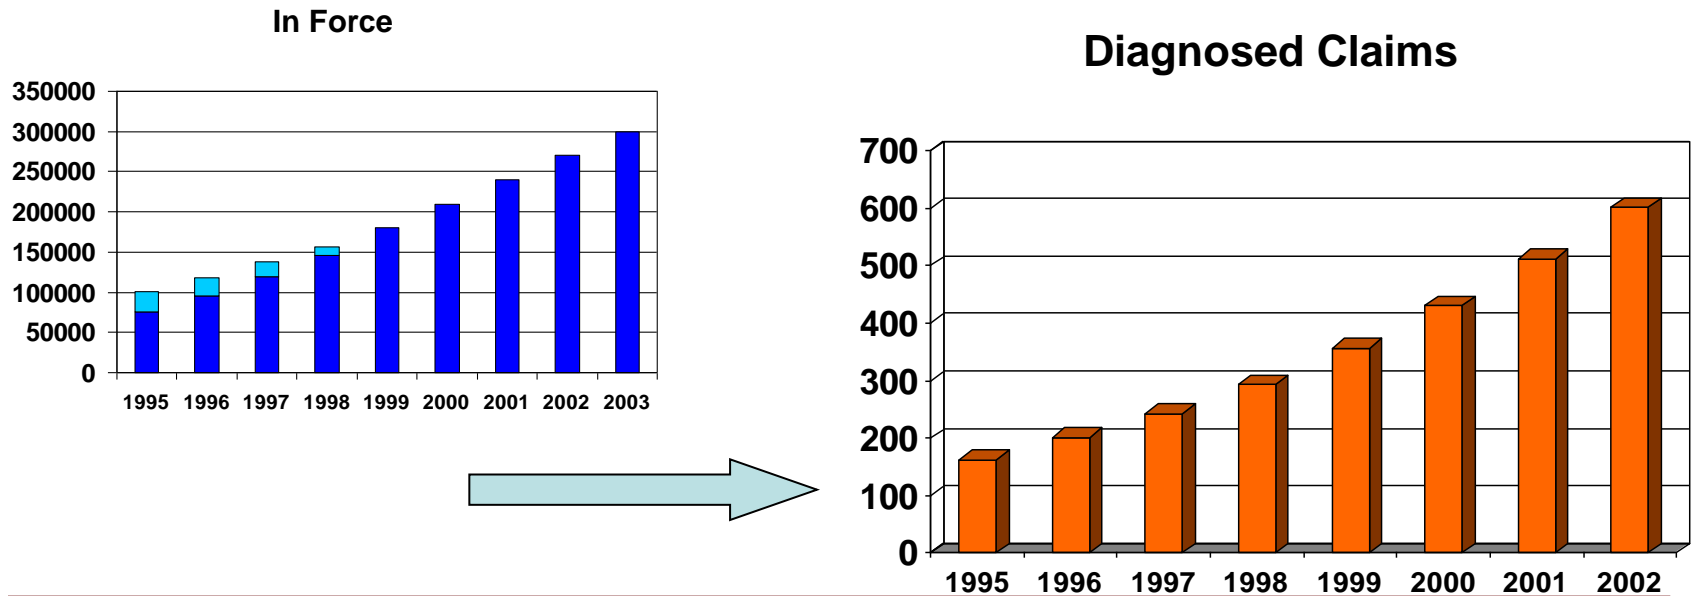

- From known in-force, estimate prior years in-force
  - Roll back known data (over time, age and duration)
  - Add back an estimate of business exiting before census

**In Force**

# CI Experience Summary - Methodology

- From the in-force, estimate exposure in each year, then estimate diagnosed claims by year (at each age & duration) using an initial set of claim rates

# CI Experience Summary - Methodology

- From estimated diagnosed claims by year, estimate settled claims by year (by age & duration) using an assumed claim development distribution

NB Max interval from diagnosis to settlement  
= 2 years in this illustration

# CI Experience Summary - Methodology

- Compare estimated settled claims with known settled claims by year, age and duration

- Can be used to present the 'adjusted' results (for a given base table and claim development distribution)
- Can iterate assumption regarding claim rates to derive the a set of 'best fit' CI claim 'diagnosis' rates

# CI Experience Summary - Methodology

- ‘Unadjusted Results’ / WP14 methodology
    - Actual Settled Claims vs Expected Diagnosed Claims
    - Mismatch by year; some adjustment by age & duration
  - ‘Adjusted Results’ / WP33 methodology
    - Actual Settled Claims vs Expected Settled Claims
    - Match A & E, but presented using settlement timing
  - Derived CI ‘Diagnosis’ Rates
    - Derive from ‘Adjusted Results’ / WP33 methodology
    - Smoothed, fitted rates in desired ‘diagnosis’ form
-

## An Update from the CMI: Critical Illness - Results

# CI Experience Summary - Data Volumes

### Exposure and Claims by Calendar Year

All ages, genders, smoker status and durations combined

# An Update from the CMI: Critical Illness - Results

## CI Experience Summary - by Year

Accelerated CI; Settled Claims; A-E using CIBT93  
Males; Non-Smokers; All ages and durations combined

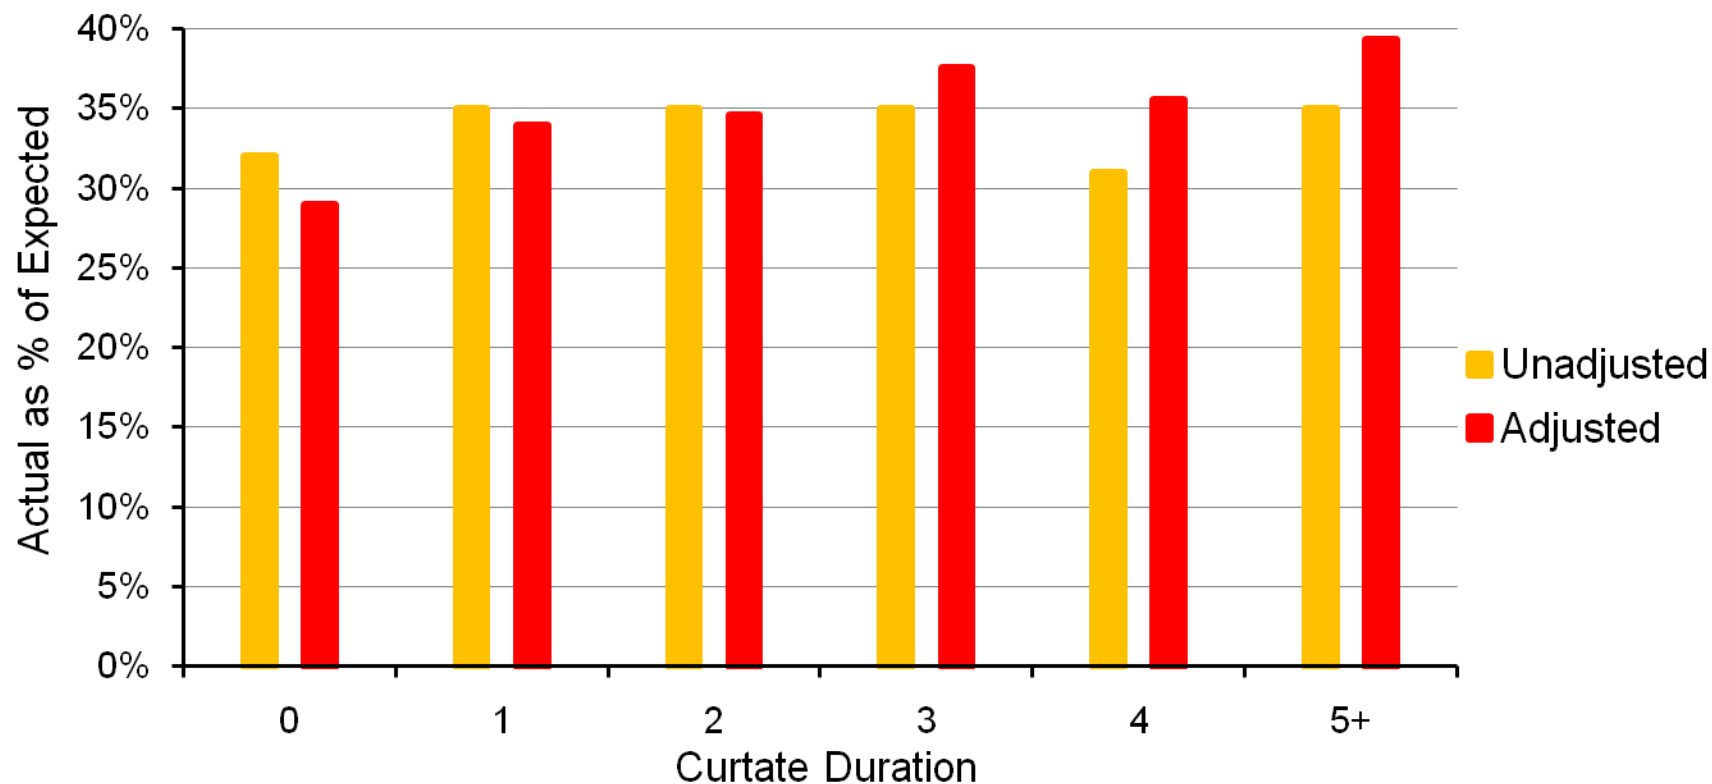

## An Update from the CMI: Critical Illness - Results

# CI Experience Summary - by Duration

Accelerated CI; Settled Claims; A÷E using CIBT93

Males; Non-Smokers; All ages combined; 2003-06

# An Update from the CMI: Critical Illness - Results

## CI Experience Summary - by Age Band

Accelerated CI; Settled Claims; A-E using CIBT93  
Adjusted Results; All durations combined; 2003-06

# CI Experience - Deriving Diagnosis Rates

- Extension of WP33 methodology
- Pragmatic approach (not mathematical model)
- Judgement required on many aspects:
  - selection / application of constraints (prior beliefs)
  - smoothness versus goodness-of-fit
  - identifying viable age range (and how to extend rates)
  - identifying variations in rates by duration
  - analysis of subsets (gender, smoker status, cause, ...)
  - derivation of CDD(s)

An Update from the CMI: Critical Illness - Derived Rates

# CI Experience - Derived Diagnosis Rates

Draft Smoothed Annualised CI Diagnosis Rates  
by Gender and Smoker Status; Accelerated CI; 1999-2004

An Update from the CMI: Critical Illness - Derived Rates

# CI Experience - Derived Diagnosis Rates

Draft Smoothed Annualised CI Diagnosis Rates by Age & Duration  
Accelerated CI; Males; Non-Smokers; 1999-2004

An Update from the CMI: Critical Illness - Derived Rates

# CI Experience - Derived Diagnosis Rates

Draft Smoothed Annualised CI Diagnosis Rates by Cause  
Accelerated CI; Males; Non-Smokers; 1999-2004

## An Update from the CMI on IP and CI

# Agenda

- Critical Illness (individual business)
    - Recent results
    - Towards CI diagnosis rates
  - Income Protection (individual business)
    - Recent results
    - Graduation of IP claim inception rates
  - Gender Differentials
  - Changes in Data Formats
  - Forthcoming Attractions
-

# An Update from the CMI: Income Protection - Results

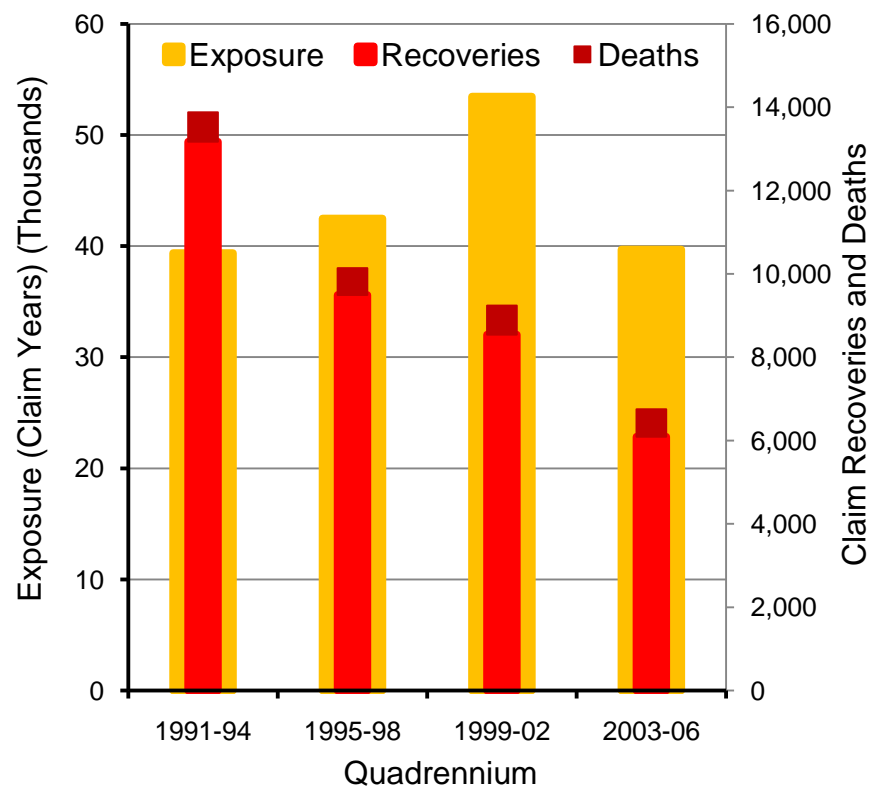

## IP Experience Summary - Timeline

- May 04: WP5-7 - Graduation of termination rates, 91-98
- Nov 05: CMIR22 - 1999-2002 Quad Report
- Aug 06: WP23 - Analysis of IIP Claims by cause, 91-02
- Feb 07: 2003 Results
- Oct 07: 2004 Results
- Dec 08: 2005 Results
- Jul 09: 2006 Results

# An Update from the CMI: Income Protection - Results

## IP Experience Summary - Data Volumes

### Exposures and Claim Events by Quadrennium

# An Update from the CMI: Income Protection - Results

## IP Experience Summary - Inceptions

Claims Inceptions; A÷E using SM1975-78; by Deferred Period  
Males; Standard \*; all Occ's and ages combined

# An Update from the CMI: Income Protection - Results

## IP Experience Summary - Inceptions

Claims Inceptions; A÷E using SM1975-78; by Deferred Period Standard \*; all Occ's and ages combined

# An Update from the CMI: Income Protection - Results

## IP Experience Summary - Inceptions

Claims Inceptions; A÷E using SM1975-78; by Occupation Class  
Males; Standard \*; all ages combined; 2003-06

# An Update from the CMI: Income Protection - Results

## IP Experience Summary - Recoveries

Claims Terminated by Recovery; A-E using SM1975-78 Standard \*; all DP's, Occ's, ages and durations sick combined

# An Update from the CMI: Income Protection - Results

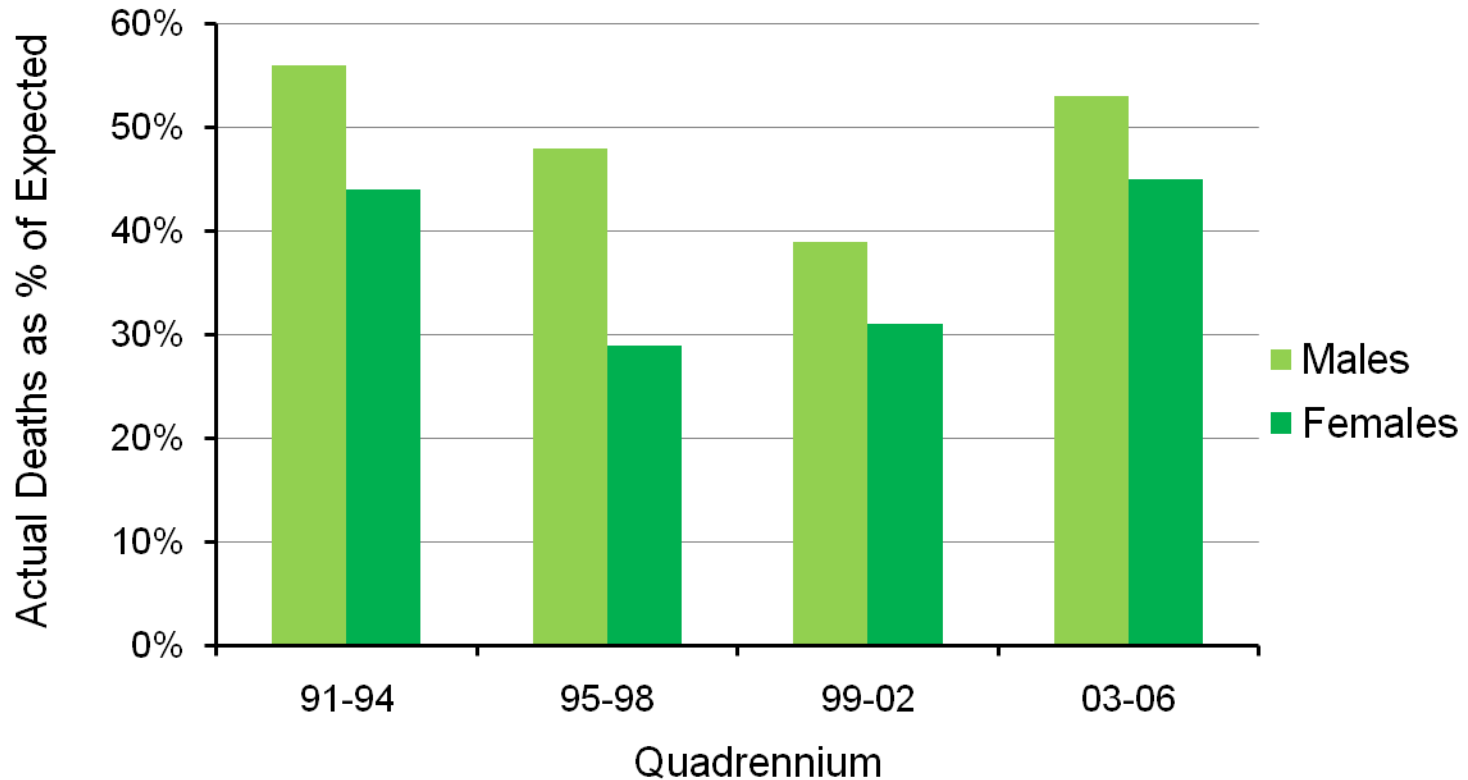

## IP Experience Summary - Recoveries

Claims Terminated by Recovery; A÷E using SM1975-78; Males  
Standard \*; all Occ's, ages and durations sick combined

# IP Experience Summary - Deaths

Claims Terminated by Death; A÷E using SM1975-78  
Standard \*; all DP's, Occ's, ages and durations sick combined

# An Update from the CMI: Income Protection - Graduation

## IP Experience - Draft Graduations

- Data for 1991-98; Males; Occ Class 1
  - Graduation of termination rates - WP5, May 04
  - Graduation of claim inception rates
    - Formal mathematical model
    - Model sickness rates and transition to claim inceptions
    - Separate application for each deferred period
    - Long process!
      - Complex model; Data issues, including 'duplicates'
    - Compare graduated rates with other experiences:
      - Females; other Occupation Classes; 99-02
-

# IP Experience - Draft Graduations

Individual IP Claim Inceptions Rates; Males; Occ Class 1  
Draft Graduations for 1991-98; compared against SM1975-78

## An Update from the CMI on IP and CI

# Agenda

- Critical Illness (individual business)
    - Recent results
    - Towards CI diagnosis rates
  - Income Protection (individual business)
    - Recent results
    - Graduation of IP claim inception rates
  - **Gender Differentials**
  - Changes in Data Formats
  - Forthcoming Attractions
-

**CMI**

discrimination in UK  
long-term CI & IP  
insurance contracts  
since 5 April 2008

## An Update from the CMI: Gender Differentials

# EU Equality Directive

- The use of gender as a factor in the calculation of premiums or benefits for insurance or related financial services products should not result in differences in the premiums or benefits of individuals.
- However, where gender is a determining factor in the assessment of risk based on **relevant and accurate actuarial and statistical data** then proportionate differences in individual premiums or benefits are allowed.
- This is subject to **accurate data relevant to the use of gender as a determining actuarial factor being compiled, published and regularly updated.**

## An Update from the CMI: Gender Differentials

# EU Equality Directive: Data Publication

- The UK has opted to regulate gender differentiation at a local level: the Treasury has set out guidance for the publication of data.
- Guidance describes minimum content, form and frequency of data to be published for each main policy type.
- General form of data:
  - Ratios of male to female rates for insured risks [in the UK / region]
  - Intelligible to someone who is not an insurance expert
  - Table(s) or chart(s) with appropriate explanations
  - Source of data and period to which it relates must be stated
  - Technical terms must be explained.
- Data may be published by insurers on an individual or joint basis or **collated by a third party**; source and accuracy must be attested to.

## An Update from the CMI: Gender Differentials

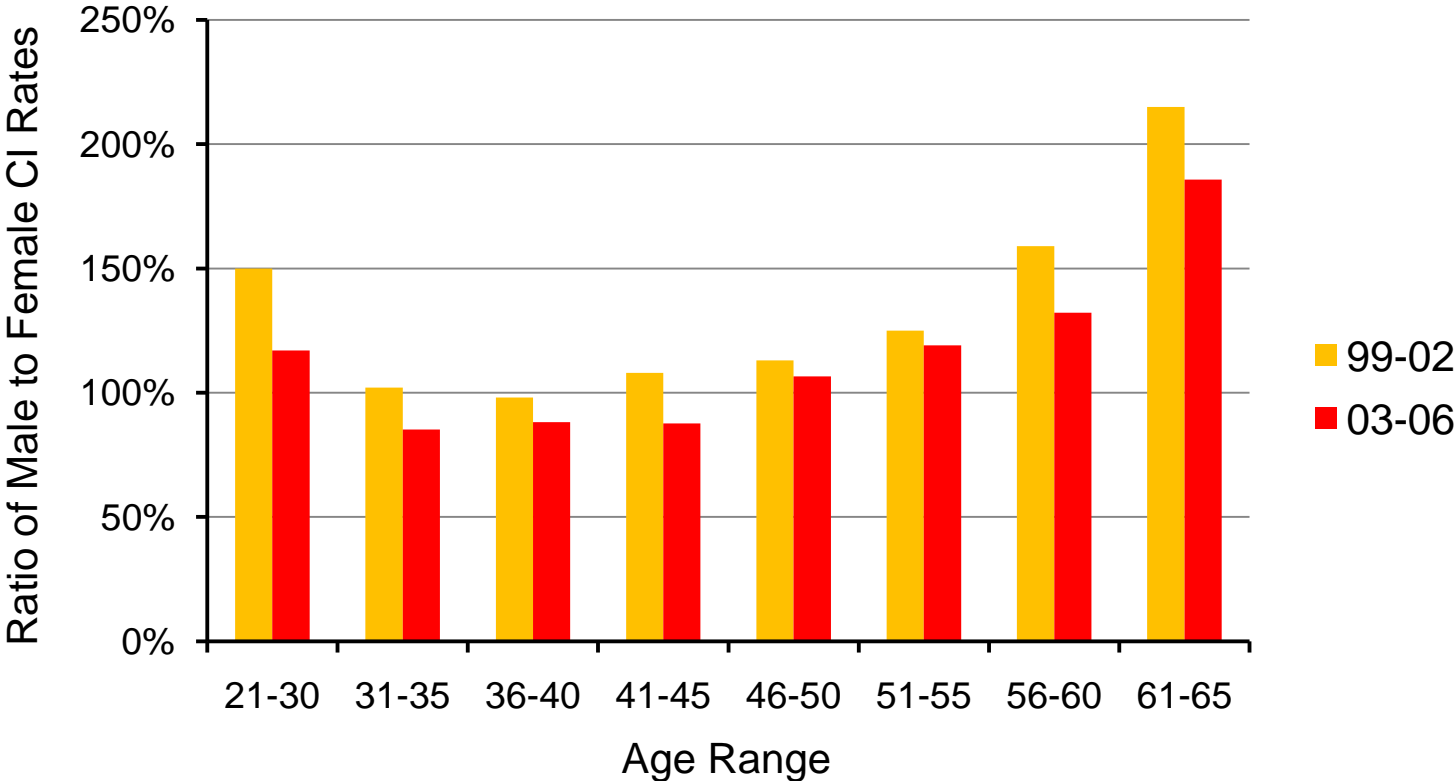

# EU Equality Directive: Data Publication

- The published data must illustrate **recent** differences in **the incidence and cost of [critical illness] / [long-term sickness]** by gender and by age.
- It may be based on graduated data using single-year age points or raw data by age ranges:
  - CI: range  $\leq 10$  years up to age 30, then  $\leq 5$  years up to age 80
  - IP: range  $\leq 5$  years up to age 75 and a single range thereafter.
- The published data may aggregate different forms of **[critical illness insurance] / [income protection insurance]**.
- The published data should be reviewed and, if necessary, updated at intervals not exceeding four years.

# An Update from the CMI: Gender Differentials

## Critical Illness Insurance

Ratio of Male to Female Claim Incidence Rates  
CMI CI data pool: 1999-02 Published ; 2003-06 Draft

# An Update from the CMI: Gender Differentials

## Income Protection Insurance

Ratio of Male to Female Claim Inception and Termination Rates  
CMI IP data pool: 1999-02 Published ; 2003-06 Draft

## An Update from the CMI on IP and CI

# Agenda

- Critical Illness (individual business)
    - Recent results
    - Towards CI diagnosis rates
  - Income Protection (individual business)
    - Recent results
    - Graduation of IP claim inception rates
  - Gender Differentials
  - Changes in Data Formats
  - Forthcoming Attractions
-

## Critical Illness

- Covered in Per Policy Coding Guide v1.5, Jul 09
  - Data at policy / life insured level
  - Move from 'census' to exact exposure calculation
  - In time will support:
    - Improved analyses (including postcode)
    - Stronger data validation
    - Increased flexibility (inputs and outputs)
- Encourage contributors to move to new format
- New contributors warmly welcomed !

# An Update from the CMI: Changes in Data Formats

## Income Protection

- Revised Coding Guide - v3.0, Jul 09
  - Consultation with contributors, Jun 08
  - Retain broadly current approach (policy records; census)
  - Some additional fields
    - Rating factors; Info on rated cases; Full dates
    - Postcode (and clarification data protection legislation)
  - Remove obsolete data fields
- Encourage contributors to move to new format
- New contributors warmly welcomed !

## An Update from the CMI on IP and CI

# Agenda

- Critical Illness (individual business)
    - Recent results
    - Towards CI diagnosis rates
  - Income Protection (individual business)
    - Recent results
    - Graduation of IP claim inception rates
  - Gender Differentials
  - Changes in Data Formats
  - Forthcoming Attractions
-

An Update from the CMI: Forthcoming Attractions

## Critical Illness - Planned Outputs

- Late 2009:
  - 2003-06 Quad Results (to member offices)
  - Gender Differentials (on 2003-06 data)
  - WP on deriving CI diagnosis rates (99-04 data)
- 2010:
  - 2007 Results (to member offices); 2008 ?
  - WP on 2003-06 Quad Results
  - WP with derived CI diagnosis rates for 2003-06

An Update from the CMI: Forthcoming Attractions

# Income Protection - Planned Outputs

- Late 2009:
  - 2003-06 Quad Results (to member offices)
  - Gender Differentials (on 2003-06 data)
  - WP on Graduation of IIP Claim Inception Rates, 1991-98
- 2010:
  - 2007 Results (to member offices); 2008 ?
  - WP on 2003-06 Quad Results
  - WP with 99-02 and 03-06 restated against IPM91-98

**The Actuarial Profession**
