Subject SA3 General Insurance Advanced Specialist Advanced

Syllabus

for the 2020 exams

20 June 2019

SA3 – General Insurance Advanced

Aim

The aim of the General Insurance Advanced subject is to instil in successful candidates the ability to apply knowledge of the general insurance environment (in the United Kingdom and other jurisdictions) and the principles of actuarial practice to providers of general insurance in complex situations.

Competences

On successful completion of this subject, a student will be able to:

- 1 understand the more complex aspects of actuarial practice within general insurance companies.
- 2 apply the principles of actuarial practice to the management of general insurance under complex scenarios.
- 3 compare the approaches by which the principles are applied in practice across different jurisdictions.
- 4 recommend coherent solutions and courses of action in relation to the overall financial management of general insurance companies.

Links to other subjects

SP7 – General Insurance Reserving and Capital Modelling Principles

SP8 – General Insurance Pricing Principles

P3 – General Insurance UK Practice Module

Syllabus topics

- 1 General insurance products and general business environment (35%)
- 2 Regulatory, legislative and taxation environment (10%)
- 3 Reserving, ALM and reinsurance (30%)
- 4 Financial, monitoring and strategies (25%)

These weightings are indicative of the approximate balance of the assessment of this subject between the main syllabus topics, averaged over a number of examination sessions.

The weightings also have a correspondence with the amount of learning material underlying each syllabus topic. However, this will also reflect aspects such as:

- the relative complexity of each topic, and hence the amount of explanation and support required for it.
- the need to provide thorough foundation understanding on which to build the other objectives.
- the extent of prior knowledge which is expected.
- the degree to which each topic area is more knowledge or application based.

Skill levels

The use of a specific command verb within a syllabus objective does not indicate that this is the only form of question which can be asked on the topic covered by that objective. The Examiners may ask a question on any syllabus topic using any of the agreed command verbs, as are defined in the document "Command verbs used in the Associate and Fellowship written examinations".

Questions may be set at any skill level: Knowledge (demonstration of a detailed knowledge and understanding of the topic), Application (demonstration of an ability to apply the principles underlying the topic within a given context) and Higher Order (demonstration of an ability to perform deeper analysis and assessment of situations, including forming judgements, taking into account different points of view, comparing and contrasting situations, suggesting possible solutions and actions and making recommendations).

In the SA subjects, the approximate split of assessment across these three skill types is 20% Knowledge, 50% Application and 30% Higher Order Skills.

Detailed syllabus objectives

0 Introduction

- 0.1 Define the principal terms in use in general insurance.

1 General insurance products and business environment (35%)

- 1.1 Describe the main features of general insurance markets.

- 1.2 Outline the key features of the Lloyd's market.

1.3 Special aspects of pricing including catastrophe modelling

- 1.3.1 Suggest the particular considerations to be borne in mind when pricing large commercial risks.

- 1.3.2 Describe the alternative approaches to rating large commercial risks.

- 1.3.3 Outline how to incorporate the return on capital in the calculation of premium rates.

- 1.3.4 Evaluate the difference between catastrophe modelling and traditional actuarial rating methods.

- 1.3.5 Outline the generic structure of a catastrophe model.

- 1.3.6 Suggest the key perils modelled.

- 1.3.7 Describe the key uses to which a non-life actuary might put the output of catastrophe models.

- 1.3.8 Suggest some key considerations in using the output of catastrophe models.

- 1.3.9. Non-modelled catastrophe

- 1.4. Outline the particular actuarial features of annuities in non-life insurance (also known as Periodic Payment Orders (PPOs))

- 1.5. Suggest possible emerging risks and disrupters and their impacts on the general insurance market

2 Regulatory, legislative and taxation environment (10%)

- 2.1 Demonstrate an understanding of the over-arching Solvency II regulatory framework.

- 2.1.1 Describe the Solvency II framework in terms of:

- background and scope.
- structure.
- Pillar 2 governance requirements.
- Pillar 3 disclosure and reporting requirements.
- group reporting requirements.

2.2 Describe the regulatory regime in place in Lloyd's

2.3 Explain the relevance of legislation to general insurance business, in relation to:

- consumer protection.
- equality legislation.

2.4 Explain the implications of the taxation of general insurance business for:

- policyholders.
- general insurance companies, mutual and proprietary.
- Lloyd's syndicates and their members.

2.5 Describe regulatory frameworks for general insurance companies, including:

- objectives of regulators.
- supervisory tools, including rulebooks and reporting requirements.
- statutory actuarial roles.
- transfer of liabilities between companies.

2.6 Compare regulatory, legislative and taxation environments between different jurisdictions.

2.7 Demonstrate how the regulatory, legislative and taxation environments affect the way in which general insurance companies carry out their business in practice.

2.8 Outline the requirements of actuarial standards in relation to actuaries practising in or advising general insurance companies.

3 Reserving, ALM and reinsurance (30%)

3.1 Determine appropriate bases for valuing the insurance liabilities of a general insurer in order to produce:

- annual accounting and statutory returns.
- management accounts.

3.2 Demonstrate an understanding of the reasons why different reserving techniques are required for latent claims and disease claims.

4 Financial management, monitoring and strategies (25%)

- 4.1 Demonstrate an understanding of financial planning in general insurance management.
 - 4.1.1 Analyse the financial planning requirements of a general insurer and develop appropriate strategies.
 - 4.1.2 Evaluate appropriate models for the purpose of financial planning to enable a general insurer to develop and monitor its objectives at either the corporate or product level.
- 4.2 **Exits and transfers**
 - 4.2.1 Demonstrate an understanding of general insurance portfolio transfer alternatives.
 - 4.2.2 Outline the reasons why a general insurer may wish to transfer a portfolio of business to another insurer.
 - 4.2.3 Describe the alternative approaches to such a transfer, including the situations in which each may be appropriate.

5 Solving problems

- 5.1 Recommend coherent solutions and courses of action in relation to the overall financial management of general insurance companies.
 - 5.1.1 Analyse complex problems in terms of actuarial, economic and financial factors to a level where appropriate analytical techniques may be used.
 - 5.1.2 Assess the implications and relevance of such factors, integrating the results into a coherent whole.
 - 5.1.3 Evaluate the results critically in a wider context, drawing appropriate conclusions.
 - 5.1.4 Propose solutions and actions, or a range of possible solutions and actions, based on this evaluation.

Assessment

Three hours and fifteen minutes written examination.
