of Actuaries

F&I Global Sub-committee

Terms of Reference

To be responsible to the Finance and Investment (F&I) Board for all matters relating to global thought leadership and support the F&I sub-committees and Board in implementing their work programme

The Institute and Faculty of Actuaries' (IFoA's) Finance and Investment – Global Strategy Sub-committee reports in to the Finance and Investment Board. The sub-committee would focus on existing and emerging areas of actuarial applications relating to the finance and investment and working with members across the world. This includes, and is not limited to Banking, Stock Market, hedge funds, Corporate Finance, Venture Capital, Alternate Assets, and any other areas where ever the actuaries and actuarial students are working across geographies.

Objectives

- To ensure more active representation from the F&I Global community
- To enable members across different geographies to participate and provide feedback on various issues relating to the Finance and Investment practice area
- To understand the local requirements within their respective geographic domains to support members working in wider areas like Banking, Investment, Alternate Assets, etc.
- To liaise with other sub-committees of the Finance and Investment Board to achieve a more global focus. The Global Sub-committee could benefit by gathering and disseminating various information covering research initiatives and collecting primary data through the active local volunteer members in the sub-committee:
 - i. To assist the Banking member interest group in implementing their strategic initiatives globally
 - ii. Any other new initiatives of Finance and Investment Board or its sub committees which require support from international members
- Provide regular updates to the board on the global F&I community pertaining to the actuarial involvement in their respective regions
- Contribute regularly to the IFoA Actuary magazine and other communications from different regions
- To participate actively on the LinkedIn discussion forum on the IFoA website, to enable more members to participate and share their views.
